Not only would you allow for the vast field of Geographic Information to be widely spread at the conference, but also allow the world to see it's advances and development. By doing so and by allowing fellow students to actually spread such riveting information alongside reputable individuals. This would allow a personal touch in order to arouse the interest of the listener, thus gaining an array of invaluable knowledge in this ever growing field.

Ultimately we are all students of this world, never ceasing to learn and only by knowledge can we inculcate the ability to shape the world for a better tomorrow.

Thanking you in advance for the consideration and the time taken.
